

## “YAZAKI BULGARIA” EOOD

8600, Yambol, 43 “Evropa” Blvd.

---

To whom it may concern

Yazaki Bulgaria EOOD is a part of Yazaki Corporation – the world's largest producer of wiring harnesses and a worldwide market leader in the automotive industry. Yazaki Corporation has locations in 43 countries all over the world and is maintaining extremely high quality in all areas of its business. That is why Yazaki Bulgaria is also looking for high quality services from all of its partners on the Bulgarian market

This letter is to confirm that Yazaki Bulgaria EOOD has been maintaining very good cooperation with Cargo Planet for more than 3 years.

Cargo Planet has organized the transport of both import and export shipments for our company from/to various destinations in Europe – France, Portugal, Spain, Switzerland.

We have also been particularly pleased by the service provided by Cargo Planet for the import of goods from a supplier in Morocco. The goods were transported in very short time without any delays or problems related with the customs formalities in the sending and receiving country.

The communication with the employees of Cargo Planet is very easy and details about the movement of the goods are always sent on time. This information is of great importance for us because transit time of goods in the automotive industry has to be very short and missing info from the forwarders can cause great problems.

Counting on our experience and collaboration we highly recommend Cargo Planet to every company looking for reliable and qualified transport & forwarding services.
